Cliff,

I've attached the NY-NJ Harbor monitoring data. Scott Kirchner is going to check on the water level data. (I think I confused that water level data with the HOBO water level data from RM 10.9 that we did provide).

I hope you have a Merry Christmas and Happy New Year.

Ed

**Subject:** More data?

Ed – I'm reaching out to you directly since I know Eugenia doesn't mind.

There are two other datasets that we don't have and to which you may have access:

1. From the 2014 AECOM report, pg ES-2: Physical Water Column Monitoring Sampling Program Characterization Summary – Draft Lower Passaic River Study Area RI/FS: "Three water level gages were installed at RM 1.0, RM 6.8, and at RM 13.9, at the fixed locations previously identified and occupied during the CPG Low Resolution Coring Program in 2008. The data from water level gages were collected contingency data should they be needed." I believe we requested these data but never got them. Have they been provided to EPA by CPG? If not, is it possible to get them?
2. New Jersey-NY Harbor WQ monitoring data at Dundee Dam; and any other such WQ data.

Thanks.

Hope you have a great Christmas and New Year.

Cliff
